Group Contract

These tenants of our group contract were agree to in our kick off meeting 10/12

All changes will be reflected with meeting date and time

Socio Tenants

Being On Time

- All team members will report for our weekly meetings Monday after class at Geisel on time
- If a team member at any point realizes that time will be an issue they will notify immediately

Finishing Work

- Each team member will complete work in a timely manner from when it was assigned
- If a member cannot properly complete their work, they will reach out to the team leads or other team members
    - Assignments are a way of project management, team members can contribute where asked

Meetings

- There will be one consistent meeting a week Monday after class at Geisel
- Additional meetings will be called if needed by attendence is only necessary for the Monday meeting
- We shall rotate meeting minutes using the meeting minute template using the order decided from the first meeting

Disputes

- Any disuptes will be brought to the team leads attention as soon as possible
- Team leads will work 1 on 1 with the individuals to resolve the dispute
- TA will only be involved if necessary but is the final escalation

Code Tenants

Coding style

- CamelCase variable names will be used
- Indentations will separate functions
- Comments will be provided for function blocks and for any instances that aren't self explanatory
    - i.e. a function call that hasn't been refreneced before or a unique solution

<div align="center">Documentation</div>

- Documentation must be provided with each push made to the main branch, this can be done during build or after, but must be complete on push
    - Push documentation will include high level file descriptions and how the code flow of the files interact
    - Documentation will be referenced and cleared by a code reviewer

<div align="center">Version Control</div>

- All changes to current repository will be created and store on a new branch with a name and description accurate to the changes being made
- Each push must be reviewed by at least one other member who was not a part of the build

Contract Changes

- Any member wanting to change or present new sections to the group contract will notify the chat or a team lead before meeting to be added to the agenda
- The change must be accompanied by a brief reason why the change should be included
- A majority vote will cause the the rule to be included
